

Lesson 5 Homework

①

$$\sigma = 16$$

$$p = 1 - \alpha = 0,95 \quad \alpha = 0,05$$

$$n = 256$$

$$\mu = 80$$

$$\bar{x} \pm k_{\frac{\alpha}{2}} \cdot \frac{\sigma}{\sqrt{n}}$$

$$80 \pm 2_{0,025} \cdot \frac{16}{\sqrt{256}} = [78,04; 81,96]$$

$$z = -1,96$$

②

$$n = 10$$

$$p = 1 - \alpha = 0,95 \quad \alpha = 0,05$$

$$\mu = \frac{6,9 + 6,1 + 6,2 + 6,8 + 7,5 + 6,3 + 6,4 + 6,9 + 6,7 + 6,1}{10}$$

$$= 6,59$$

$$\bar{x} \pm k_{\frac{\alpha}{2}} \cdot \frac{\sigma}{\sqrt{n}}$$

Критерий студента. неизвестно σ

$$\sigma = \sqrt{D(x)}$$

$$D(x) = 0,2032$$

$$\sigma = \sqrt{D(x)} = 0,15080$$

①

$$\bar{X} \pm k_{\alpha} \frac{\sigma}{\sqrt{n}}$$

$$6,19 \pm 2,267 \cdot \frac{0,4508}{\sqrt{10}}$$

$$[6,267; 6,912]$$

③

$$\alpha = 0,05$$

$$\mu_0 = 17$$

$$\mu = 17,5$$

$$D(X) = 4 \quad \sigma = 2$$

$$z = \frac{\mu - \mu_0}{\frac{\sigma}{\sqrt{n}}} = \frac{0,5 \sqrt{100}}{2} = \frac{0,5 \cdot 10}{2} = 2,5$$

$$z_{\text{табл.}} = z(P=0,95) = 1,65$$

$z_{\text{расч.}} \in H_1 \Rightarrow \mu = 17,5$ — гипот. остаточное
БРАК.

④

$$\mu_0 = 200$$

$$n = 10$$

$$\mu = \frac{202 + 203 + 199 + 197 + 195 + 201 + 200 + 2004 + 194}{10} = 199,9$$

$$\alpha = 0,01 = 1\%$$

$\sigma - ?$ *Результат
свойства*

$$H_0 = \mu = \mu_0$$

$$H_1: \mu \neq \mu_0$$

$$t_{\text{рас}} = \frac{\mu - \mu_0}{\frac{\sigma}{\sqrt{n}}} = -1,065$$

$$D(x) = 19,83 \Rightarrow \sigma = 4,4534$$

$$t_{\text{табл}} = 2,851$$

Вывод: Средний вес = 200 верный (H_0).
